Thermal Noise in Resistors The most common example of noise due to velocity fluctuations is the thermal noise of resistors. Spectral noise power density vs. frequency f $k =$ Boltzmann constant $T =$ absolute temperature Since $R =$ DC resistance Sun, 09 Dec 2018 05:21:00 GMT III Electronic Noise - Shot noise in electronic devices results from unavoidable random statistical fluctuations of the electric current when the charge carriers (such as electrons) traverse a gap. If electrons flow across a barrier, then they have discrete arrival times. Noise (electronics) - Wikipedia - 3.4 Current
