Bellovin, Jason Nieh Mon, 10 Dec 2018 09:16:00 GMT Technical Reports | Department of Computer Science ... - In machine learning, the perceptron is an algorithm for supervised learning of binary classifiers. A binary classifier is a function which can decide whether or not an input, represented by a vector of numbers, belongs to some specific class. It is a type of linear classifier, i.e. a classification algorithm that makes its predictions based on a linear predictor function combining a set of ... Wed, 05 Dec 2018 21:53:00 GMT Peer Reviewed Journal - IJERA.com - Artificial intelligence (AI), sometimes called machine intelligence, is intelligence demonstrated by machines, in contrast to the natural intelligence displayed by humans and other animals. In computer science AI research is defined as the study of "intelligent agents": any device that perceives its environment and takes actions that maximize its chance of successfully achieving its goals. Thu, 29 Nov 2018 22:08:00 GMT Artificial intelligence - Wikipedia - Summary In many fields today, multiple sets of data

are readily available. These might either refer to multimodal data where information about a given phenomenon is obtained through different types of acquisition techniques, or multiset data where the datasets are all of the same type but might be acquired from different subjects, at different time points, or under different conditions. The strongest correlate of opinion on climate change is partisan affiliation. Two-thirds of Republicans (67%) say either that the Earth is getting warmer mostly because of natural changes in the atmosphere (43%) or that there is no solid evidence the Earth is getting warmer (24%).
