Fri, 11 Jan 2019 00:38:00 GMT IJPRAI Special Issue on Facial Image Processing and Analysis - Definition. Computer vision is an interdisciplinary field that deals with how computers can be made to gain high-level understanding from digital images or videos. From the perspective of engineering, it seeks to automate tasks that the human visual system can do. "Computer vision is concerned with the automatic extraction, analysis and understanding of useful information from a single image or ... Deep metric learning is useful for a lot of things, but the most popular application is face recognition. So obviously I had to add a face recognition example program to dlib. The new example ...
